

The premier school of IT expertise and innovation

2024 - 2025

Shaping the future of IT

Programmes for international students
Summer / Winter School Programme - Semester or Full-Year Exchange

PARIS - BARCELONA

Join a world of innovation

For 20 years, Epitech - The European Institute of Technology, has been the premier school for IT expertise and innovation.

In 1999, when society was only just starting to think about digital technology, Epitech was leading the way with its cutting-edge approach to IT and innovation, based on completely original teaching methods.

At Epitech, you don't just learn how to be the perfect developer. First and foremost, you'll need to know how to anticipate problems, find solutions and develop new skills by being exposed to other disciplines. We'll teach you how to learn rather than repeat facts and carry out imitative or repetitive tasks.

In short, we'll take you out of your comfort zone. We'll encourage you to think for yourself and to initiate your own projects.

So, what are you waiting for?
Come live your own Epitech experience.

Established in

Why choose Epitech?

Choosing Epitech means living a unique experience. **Autonomy, freedom, and creativity** are the key words defining our school. Our active, inductive, project-based learning style is adapted to everyone. We train dynamic IT experts who are leaders in innovation and information technology.

Study in a beautiful european city

Exchange students from our international partners can study in one of 2 Epitech's European campuses: Paris or Barcelona. You can study in one of these campuses for a semester or a full academic year.

*Please note that other Epitech campuses in France other than Paris may be considered by international students, on a case-by-case basis depending on the candidates' profiles. For more information on this topic please contact our International Relations Team.

A unique and active pedagogy that creates leaders

At Epitech we offer a learning experience of excellence for all. Our innovative project-based learning method is founded on active and inductive learning which results in high-level technical skills as well as essential soft skills. By the end of your program, you will have completed dozens of diverse projects using the latest technologies in the field of IT. Epitech's methods will enable you to learn independently, understand business practices, work in teams, and become a good decision-maker.

Why choose Epitech?

Choosing Epitech means living a unique experience. **Autonomy, freedom, and creativity** are the key words defining our school. Our active, inductive, project-based learning style is adapted to everyone. We train dynamic IT experts who are leaders in innovation and information technology.

High impact careers

Studying IT in Epitech will help you unleash your full potential and pursue a successful career. Our students are recognized in the professional world for their skills, their ability to adapt to new situations and for their team spirit. That's why their employment rate after graduation is nearly 100%.

An international footprint

In a globalized world, a high-level career in IT cannot be envisaged without an international dimension. Joining Epitech is choosing to join a school with an international ecosystem, rich in opportunities. Epitech has a national and international network with a total of 20 campuses: 15 in France, 3 in Europe, 1 in West Africa and 1 in North America. Epitech also has a network of over 120 international partners so that all of the 4th year students can complete a study abroad experience.

Connect with our professional network

Since its creation, Epitech has worked with a wide range of companies to prepare students for their professional future. We focus on three areas: career, innovation and diversity, allowing partner companies to develop privileged relationships and to contribute to the teaching methods as closely as possible. Students and companies work together to bring innovation to the heart of the various economic sectors, technologies and societal issues.

Personal support every step of the way

Whatever support you need, we're here for you at every stage of your academic journey. We want to help you achieve your potential and have the best experience possible.

« Choosing Epitech was one of the best choices I could make. The education system was on another level; the study environment was very similar to the IT industry and prepares you for the future professional life. Another thing that I liked was that when I was stuck trying to solve problems, a mentor was always present and guided me in the right direction. »

Dhananjay Bhardwaj
Chitkara University (India)

« Being part of the Epitech community has allowed me to connect with fellow tech enthusiasts and foster a collaborative spirit. Choosing Epitech as my study abroad destination has been truly transformative, and I am grateful for the opportunity to learn and grow in such an inspiring environment. »

Juan José Esquivel
TecMilenio University
(Mexico)

« In Epitech they push you to think on your feet and give you the opportunity to learn in the way that works best for you. It's a very hands-on and practical approach, which I'm sure will be beneficial for my future career. »

Stefania-Cristina Mihai
Politehnica University
of Bucharest (Romania)

You can find more information here

Semester or Full-Year Exchange

1

A 100% English curriculum

All modules offered in English, taken alongside local students and other exchange students

2

IT Courses

Either 1st, 2nd, or 3rd year level CS courses in an interactive, project-based learning environment

3

Second language courses

Take French or Spanish as a foreign language and participate in cultural activities with other exchange students

Year 1 • Fundamentals and autonomy

- Projects: Imperative programming, system programming
- Participate in the famous C Pool that will literally plunge you into the fundamentals of IT
- Complete and present a series of projects so you get used to explaining what you create

Year 2 • Design and Teamwork

- Projects: Object-oriented programming, functional programming, concurrent programming
- Participate in the C++ Pool that will immerse you in coding
- Conclude 2 projects that will learn you how to create a video game which integrates the most widely used current graphic motors and a complex simulation combining parallel programming and artificial intelligence
- Give presentations on each of these projects in order to summarize what you have learned over the past semester

Year 3 • Diversification and innovation

- Projects: Web, mobile, AI and DevOps technology
- Reflect on the way that IT and your professional goals could be intertwined & create a concrete professional project
- Begin with the Moonshot & a series of conferences given by the best experts of a variety of domains
- Learn about the future challenges of IT and current trends in the field

Program dates

You have the option of choosing to study at Epitech for a semester or a full academic year:

- Semester 1: End of September to late January
- Semester 2: late January to beginning of July

- Semester 2: January through March

- Semester 1: September through January
- Semester 2: Late January through late May

1st year program

2nd year program

3rd year program

*If you would like to take 2nd year courses you can attend Epitech for the spring semester only, or else take modules in the fall from either the 1st or the 3rd year according to your level and stay for a full year.

Choose your campus

Paris

Paris, the capital of France, is a major European city and a global hub for art, fashion, gastronomy and culture.

Renowned as the #1 city for academic pursuits worldwide, it comes highly recommended by 9 out of 10 international students as an ideal study destination.

The Epitech campus in Paris was the school's very first location and remains its largest campus. Students have access to a privileged professional development, in close connection with the Parisian and national French Tech.

The campus features a variety of workspaces, coworking areas, and lounges, providing access to all the resources available at the Epitech Innovation Hub an environment tailored for IT enthusiasts to craft cutting-edge technological solutions.

Nestled in the heart of the French capital, students at Epitech benefit from privileged connections with industry giants such as Google, Amazon, Microsoft, Sony, Ubisoft, Bouygues, Société Générale, and numerous other major corporations.

Barcelona

Barcelona, the capital of Catalonia, Spain, stands as the country's second most populous city with 1.6 million residents, following Madrid.

As the largest city on the Mediterranean Sea, Barcelona is distinguished as one of the top 15 safest cities globally and ranks among the ten most attractive cities for launching a digital business.

The city's tech ecosystem is robust, hosting over 100 tech companies and serving as the headquarters for more than 1200 startups, making it the 6th largest hub in Europe.

Additionally, Barcelona claims the position of the 5th largest investment hub in Europe.

Epitech's Barcelona campus actively engages in forming tailored partnerships with companies, strategically placing innovation at the forefront of various economic sectors.

Student life at Epitech

You'll learn a lot, but you'll also have so much fun...

During your study exchange in Epitech you'll get outstanding teaching, excellent spaces for socialising, learning, and wide-ranging support.

We know that the study experience extends beyond the classroom. At Epitech, the student life and the wellbeing of our students represents a fundamental component of our school's educational goals. To ensure your integration, the International Relations team offers different activities for international students throughout the year.

{ Cultural Activities }

{ A wide range of student associations }

{ Learn a Foreign Language }

{ Access to fitness club }

{ Personal support every step of the way }

{ Buddy Program }

Application requirements

How to Apply

Exchange students must be nominated by their home institution

Applications should include:

- Copy of passport (or National Identity Card for European students)
- Official university transcripts translated in French or English
- English language proficiency (TOEFL IBT: 65 / IELTS: 5.5 / TOEIC: 600, or English test of the home institution)

Epitech will then contact you to introduce you to the program and give recommendations on the appropriate placement according to your technical background.

Founded in 1980 by Marc SELLAM, IONIS Education Group has today become the leading private-sector higher education group in France. The 29 schools and entities it comprises in 27 cities across France and abroad bring together almost 35 000 students in the fields of business, marketing, communication, management, finance, data-processing, computing, digital applications, aerospace, energy, transport, biotechnology, innovation and e-sports ... IONIS Education Group's mission is to craft New Intelligence for Enterprise, both today and in the future. The principle values instilled in the Group's future graduates are an outward-looking international perspective, a keen awareness of the import of innovation and an entrepreneurial mindset which embraces adapting to change. It is these values which will turn them into key actors in tomorrow's economy, joining ranks with our Alumni networks which already represent over 100 000 members.

Epitech **The IT expertise and innovation school**

Founded in 1999, European Institute of Technology has three branches : Epitech Technology, Epitech Digital, and Epitech Executive. Each year, Epitech Technology taught over 6,000 students on its campuses (15 in France and 5 abroad), through the 5-year post-secondary Grande Ecole Programme and its MSC Pro programmes, which last 2 or 3 years following a bachelor degree. The uniqueness of Epitech results from its teaching methods, enabling its students to grow, develop and succeed. Its practical programme and project-oriented methods (200 projects per student), enable students to acquire all the necessary technical and soft-skills (open-mindedness and innovation) that makes them well recognised experts in IT. The programme also provides them with in-company experience, representing 30% of the time, and international experience on the campuses abroad or at one of our over 120 partner universities, thereby contributing to the development of a global vision regarding the issues that society is currently facing. Epitech students are sought-after profiles, hired even before they leave the school. We now have a network of nearly 10,000 alumni working around the world.
